New Laboratories Set-up:

1. Microsensors Laboratory: Two low-temperature Dewars, two closed-cycle Li-He refrigerators, various cryogenic inserts, microprocessor-based programmable temperature controllers, temperature sensors, multimeters, oscilloscopes, power supplies, pulse generators and fiber optic instrumentation support the low temperature device characterization and superconductivity research. The optical characterization facilities include an Oriel MS257 spectrometer/monochromator, two IR sources, a calibrated pyroelectric detector, various fiberoptic components, laser diodes and Oriel 7 GHz photodiodes. The monochromator/spectrometer and IR sources allow the characterization of devices and materials from 1 - 12 μm . Four computer workstations are used as system controllers for data acquisition and modeling. (with Donald P. Butler)
2. Noise and Reliability Laboratory: This facility is used for the computerized I-V, C-V, and noise characterization of devices. It consists of two dynamic signal analyzers, lock-in amplifiers, various programmable multimeters, programmable LCR meters, plotters and printers, and system controllers. In addition, there is a complete computer controlled Hewlett-Packard low-frequency and dc device characterization system that is also capable of device modeling and design. The lab contains a 6 ft x 6 ft low frequency shielded room with a noise attenuation of 100 dB to electric fields and plane waves from 14 kHz to 10 GHz and 30 dB to magnetic fields at 60 Hz. This lab is designed for computer controlled data acquisition and processing.

- I like how she encourages questions. She really wanted to make sure that every student understood what was going on in the course.

- Her honesty and humor. Very pleasant attitude. Prompt availability of homework solutions.
- She talked a lot about how things would apply in "real world" situations, instead of just showing things on paper.
- Outstanding knowledge of material and proper pacing
- Sincere effort to explain each question or concern
- Best instructor in this school.
- Always well prepared, always able to answer questions of students, presentation of material clear.
- Good sense of humor. Compassion.
- Very willing to talk to students outside of class and explain problems to students.
- Excellent use of lab facilities.
- She has great office hours: all day long.
- She enjoys the subject matter and has a good understanding of it.
